Fund Overview

Investment Goal: The Fund seeks long-term capital appreciation.

Principal Investment Strategies:

The Fund invests in securities that the portfolio management team believes are attractively valued with the potential to exceed investor expectations. Under normal circumstances, this Fund invests at least 80% of its assets in common stocks and other equity securities of large-capitalization U.S. companies. The Fund defines a large-capitalization company as one whose market capitalization falls within the range of the Russell 1000[®] Index at the time of purchase. The market capitalization of the companies in the Fund's portfolio and the Russell 1000 Index changes over time; the Fund will not automatically sell or cease to purchase stock of a company it already owns just because the company's market capitalization changes.

Pacific Funds Large-Cap offers shareholders:

A Time-Tested Process

For more than 25 years, the investment team has managed institutional assets using a process rooted in fundamental analysis and designed to identify potential catalysts for a stock's positive relative performance.

Focused on Expectational Upside

The Fund seeks to outperform its benchmark by investing in a mix of stocks the team believes is attractively valued and should provide a controlled level of risk in down markets.

Anchored in Style Purity

Stocks whose market capitalization falls within the range of the Russell 1000 Index, and are expected to achieve above-average returns relative to the Fund's benchmark over a market cycle, will be selected for the Fund.

Returns reflect reinvestment of dividends and distributions. Returns shown at net asset value (NAV) have all distributions reinvested. If a sales charge had been deducted, the results would have been lower. Class A and Advisor Class shares inception on 1/11/16. The Fund acquired the assets of the Rothschild U.S. Large-Cap Core Fund (the Predecessor Fund) in a reorganization transaction on 1/11/16. The Fund's objectives (goals), policies, guidelines, and restrictions are substantially the same as those of the Predecessor Fund. The performance figures shown for Class A and Advisor Class shares of the Fund reflect the historical performance of the then-existing Investor Class shares of the Predecessor Fund for periods prior to 1/11/16. The performance figures for periods prior to 1/11/16 have not been adjusted to reflect fees and expenses of Class A and Advisor Class shares of the Fund, respectively. If these returns had been adjusted, then performance for the share classes could vary from the returns shown based on differences in their fee and expense structures. The Investor Class shares of the Predecessor Fund commenced operations on 12/31/14.

¹Class A shares reflect the deduction of an up-front 4.25% sales load. Advisor Class shares are sold at net asset value (NAV) without an initial sales charge and do not include a CDSC. Performance reflects any applicable fee waivers and expense reimbursements. ²A market capitalization-weighted index of 500 widely held stocks often used as a proxy for the U.S. stock market.

Indexes are unmanaged and cannot be invested in directly. Further, they hold no cash and incur no expenses.

For performance data current to the most recent month-end, call Pacific Funds at (800) 722-2333, option 2, or go to PacificFunds.com/Performance. Performance data quoted represents past performance, which does not guarantee future results. Current performance may be lower or higher than the performance quoted. The investment return and principal value of an investment will fluctuate so that shares, when redeemed, may be worth more or less than the original cost.

All share classes may not be available at all firms, and not all investors may be eligible for all share classes.

About Principal Risks: All investing involves risk, including the possible loss of the principal amount invested. There is no guarantee the Fund will achieve its investment goal. Equity securities tend to go up or down in value, sometimes rapidly and unpredictably. Large-capitalization companies tend to have more stable prices than small- or mid-capitalization companies, but are still subject to equity securities risk and their prices may not rise as much as the prices of companies with smaller market capitalizations.
